## TYPE OF MEDICAL PROBLEM:

I have mental health problems: Seizure, Fugue, Chronic Depression and Adult ADD. I must receive regular medication. Today, 17 Nov. 05 I was transferred from Gardner Hill, mental health unit, without receiving meds. Furthermore, with the knowledge that I cannot abide excessive noise or situations which may exacerbate confusion, I was transferred to the Greentree unit - a noisy and extremely contrabutious environment.

I bring to your attention a long unsolved matter regarding mental health. I have combined psychiatric disorders, one of which is adult ADD.

The U.S. District Court of Delaware has given me thirty days to amend my complaint regarding the above. I would rather see this solved within the institution.

Various letters and complaints were filed. On 23 November 05 Psychiatrist continued ADD meds along with other medications. I never received the ADD meds. However was advised by nurses and staff supervisor that it was

ordered.

on 11 Jan 06 The Psychiatrist stopped my Add medication And stated that Correctional Medical Systems does not recognize as treat ADD disorder. I have been communicating with the National Institute for Mental Health, National Institute of Neurological Disorders and Stroke And CHADD - Children And Adults With ADD.

ADD is Listed in the Diagnostic and Statistical Manual (DSM-IV TR); it is Recognized by the American Psychiatric Association and is a Recognized disorder by the Federal Government and Social Security Adm. . . . .

My Request is that the medical Dept Administers the most successful of Alternative Medications And without unnecessary delay, As left untreated may result in further neurological damage which may diminish my ability to function in the future.

As a result of my medication being desisted I am suffering "episodes" where I cannot concentrate at all. Also I get confused, distracted, angry, frustrated, because I cannot keep a steady course in thought. I've lost my temper several times and I am afraid because I am unable to stop myself, that something bad will happen. Sometimes I am "approached" for the way I am.

TKP95

Noise Sets me off tremendously; sometimes I cannot separate the sounds. = Fear for the future if I am not treated - Both Counseling and proper medication \_\_\_\_\_ and a nursing AIDS that will not aggravate my condition and other mental health therapy is available on a regular basis ..

.....

Note: Dr. did, after a time prescribe Wellbutrin for ADD - But this poses more a threat for seizure than regular add meds please plus, according to National Institute of Mental Health, Wellbutrin must be administered twice daily in order to be even minimally effective. It is prescribed once a day and has very little effect

Against my overall condition. . .

It is as if there is no treatment.

Every day while suffering this disorder  
is a long one. Pushing beyond the  
normal call. I fear for the future

My NAME is Leonard Baylis, 55 years old. I moved to this unit on 3 April 06 (Ahu unit). I have mental health problems. I have difficulty in excessively loud or confrontational environments. I have "episodes" Sometimes I get lost. I can actually feel my mental state deteriorating. I feel that something is going to happen. I have since November 05 been asking to be housed in an Area More suitable to my condition. This has been prolonged excessively. I say this because I have been involved in confrontations where it all started because I get confused I lose track of time and get angry and can't take Right. It is hard to explain. But I believe that Something Serious is going to happen.

Dear Counselor and

I have regularly been threatened by my cell mate. I have gone to staff with this and am told there is nothing they can do. I have mental health issues. I have written to you before about this. I am supposed to be considered for the special needs unit.

I feel in imminent danger. My cell mate told me "I could end up like Mr. Psycho and be found dead in the morning."

Can anyone do anything about this?
